

Head of Medical Affairs, Celgene UK (Windsor)

As Head of Medical Affairs for Celgene you will be leading a growing team of 6 Regional Medical Liaisons, 2 Medical Information Associates and 1 IIT Study Manager in an energetic and fast growing global biopharmaceutical company with 3 major oncology products all recently launched in areas of high unmet medical need: Revlimid (lenalidomide), Thalidomide Celgene (Thalidomide) and Vidaza (azacitidine).

Within Celgene you will lead the development and management support for Investigator Initiated studies in key strategic areas, provide medical education and technical/scientific support with your team to ensure accuracy of promotional and educational information, and to develop optimal materials for market access submission to bodies such as NICE and SMC. In the healthcare community you will optimise and develop relationships and collaborations with practicing physicians, investigators and members of advisory boards.

Together with the Medical Director, you will work to establish a compelling vision for the medical and clinical organisation in the UK & Ireland affiliates in accordance with the international strategy that drives scientific product development and commercialization activities to the highest standards and optimal organisational outcome.

A GMC registered physician with proven industry experience, you will have a post graduate qualification such as MRCP, MRCPGP, and/or Diploma in Pharmaceutical Medicine, ideally with experience in haematology or oncology. Strong leadership and management skills as well as excellent communication and organisational skills are essential.
