RBW Consulting is a Pharmaceutical recruitment specialist focusing on niche skill areas, particularly the placement of Medics throughout the industry. Our medical team are expert in finding the best candidates for roles covering medical affairs, clinical development and pharmacovigilance/drug safety.

We are currently charged with sourcing for a key position with our client based in Copenhagen.

The company:

Ferring Pharmaceuticals is a research driven biopharmaceutical company devoted to identifying, developing and marketing innovative products in the fields of reproductive health, urology, gastroenterology, endocrinology and osteoarthritis.

The company has gained international recognition over the last 20 years for the creation of innovative and inventive medications that improve the quality of life of children and adults around the world.

The role:

Reporting to the VP of Clinical Research for the Reproductive Health team, you will provide medical expertise on obstetrics and gynaecology to the Reproductive Health team, and support products at all stages of product development.

For a confidential discussion about this role, or to discuss other opportunities for medically qualified professionals in the Pharmaceutical industry, please contact **Sam Punt** on **01293 584300**, or email sam.punt@rbwconsulting.com

Main tasks:

- ✔ Medical evaluation of in-licensing opportunities in the therapeutic area.
- ✔ Medical monitoring in clinical trials, DSMB Management and risk management planning for projects in the therapeutic area in collaboration with Global Pharmacovigilance.
- ✔ Preparation of the clinical development plans, protocols, study reports, and the clinical overview and summaries of the regulatory dossier.
- ✔ Scientific and medical support to clinical trial activities of the group in accordance with plans and preparation of the clinical documents for regulatory submissions and requirements.
- ✔ Up to date knowledge within the therapeutic area and transmit this knowledge to the rest of the department and organisation.

The individual:

- ✔ Medical Doctor.
- ✔ Specialist in obstetrics and gynaecology.
- ✔ Previous experience in the pharmaceutical industry, either in a clinical development or medical affairs function.
- ✔ Experience in clinical trials and an understanding of clinical research within the Pharmaceutical industry.
